PROFESSIONAL SUMMARY

Visionary DevOps Tech Lead with 10+ years of technology leadership, specializing in cloud-native solutions on Azure and AWS by following 5 main pillers as solution architect. Spearheaded ultra-resilient ecosystems for IoT, sensors, and enterprise architectures, reducing deployment times by 50% via GitOps/GitHub CI/CD pipelines and Terraform IaC. Expert in FinOps(Cloud Health) for cost optimization, achieving 30% savings by decommissioning unused resources like EC2 instances and Azure VMs. Integrated DevSecOps practices using Tfsec, Snyk, and Tflint for vulnerability management, ensuring secure, scalable deployments. Proficient in container orchestration with Docker/Kubernetes (AKS/EKS), observability tools (Prometheus, Grafana, Azure Monitor), and scripting (Python, Bash, SH). Mentored cross-functional teams to embed Agile/Scrum principles, fostering continuous improvement and collaboration across organizations using LLM Model.

SKILLS

Cloud Platforms:	Azure, AWS (Scalable automation design & implementation)
IaC:	Terraform, CloudFormation, ARM Templates
Containerization:	Docker, Kubernetes (AKS/EKS)
CI/CD:	GitHub actions, Pipelines, Azure/AWS DevOps, YAML,argoCD, Jenkins
DevSecOps & Security:	Sonarqube,Tfsec, Snyk, Tflint, GitOps
Scripting:	Python, Bash, SH
Monitoring:	Azure Monitor, Prometheus, Grafana, Loki, Zabbix, Tableau
Networking:	VPN/Vnet, Subnets, Express Routes, VPN, VPN Gateway Pearing.
IoT & Other:	Sensors, Devices, MQTT, Draw.io (HLD/LLD), HPSM Ticketing , Database Collaboration, Prompting Expert, by using AI | LLM.
Methodologies:	Agile, Scrum, FinOps (Cloud Health), Disaster Recovery RTO|RPO

PROFESSIONAL EXPERIENCE

Solution Architect | ***Wipro Limited*** *March 2026 – Present*

- Led strategic planning and cross-functional collaborations to align DevOps with business goals, mentoring teams on DevSecOps principles, security automation, and vulnerability management.

- Deployed cloud infrastructure using Terraform and Python SDK, managing Azure resources effectively and optimizing costs by decommissioning unused assets (e.g., Direct Connect, AWS accounts, EC2 instances, VMs, Resource Groups, AKS), resulting in 30% savings.
- Implemented CI/CD pipelines in Azure DevOps and GitHub, configuring service principals and agent pools for 50% faster delivery.

SCM Lead | ***Delfingen India Pvt Limited*** *December 2024 – August 2025*

- Led strategic planning and cross-functional collaborations to align DevOps with business goals, mentoring teams on DevSecOps principles, security automation, and vulnerability management.
- Deployed cloud infrastructure using Terraform and Python SDK, managing Azure resources effectively and optimizing costs by decommissioning unused assets (e.g., Direct Connect, AWS accounts, EC2 instances, VMs, Resource Groups, AKS), resulting in 30% savings.
- Implemented CI/CD pipelines in Azure DevOps and GitHub, configuring service principals and agent pools for 50% faster delivery.
- Configured Network Security Groups, Application Security Groups, and VPN solutions to enforce firewall rules and ensure secure networking.
- Monitored infrastructure with Log Analytics, Azure Monitor, AWS CloudWatch, and workspaces, setting metrics and action groups for real-time alerts; troubleshot VM/EC2 performance issues proactively.Designed scalable architectures using Availability Sets/Zones, Load Balancers, and Application Gateways; provisioned Azure SQL Databases and Storage Accounts (Standard/Premium).

Deputy Manager Purchase | ***Star Engineers India Pvt Ltd*** *February 2022 – December 2024*

- Conducted Iworkks tool trainings and deployments, managing data center infrastructure with periodic checks, communication metrics, and action plans for real-time alerts in Microsoft Azure.
- Planned physical readiness for disaster recovery and execution, ensuring 99.9% infrastructure availability.
- Troubleshoot server performance issues and maintained designed infrastructure for high availability.

Manager commerials and DevOps | ***Mutual Industries Limited*** *December 2017 – January 2022 (and January 2016 – November 2016)*

- Led Microsoft Dynamics implementation and cloud data management in Microsoft Azure.
- Set up data center infrastructure, implementing Hypervisor, virtualization, application installations, and thin client setups with user access creation.
- Defined Cisco switch routes, implemented CAP, and managed data center hardware migrations and updates.

Executive App deployment, DevOps | ***Varroc Polymer Pvt Ltd*** *November 2016 – November 2017*

- Deployed SAP S4 HANA with functional testing.
- Implemented data center setup, including fiber patching, virtual connectivity integration, subnet creation, IP planning, server/router/database installation, and integration.
- Planned, tested, and executed redundancy; conducted database and backup testing, fault finding for connectivity issues.
- Integrated new devices and added them to clusters.

Executive | ***IAC International*** *February 2014 – December 2015*

- Implemented QAD with user creation and testing.
- Handled network hardware installation, purchasing, commissioning, and end-to-end services implementation and testing.

Engineer | ***I9 Infocom*** *September 2010 – April 2012*

- Formed ring-type architecture to avoid link-down situations.
- Performed network hardware installation, site integration, commissioning, and end-to-end services implementation and testing before commercialization.

PROJECTS

E-Commerce Website Deployment Microsoft Azure (DevOps Platform)

- Designed and deployed a scalable e-commerce platform on Microsoft Azure for robotic product sales
- Implemented CI/CD pipelines for automated build, test, and deployment using Azure DevOps
- Deployed containerized microservices on Azure Kubernetes Service for high availability
- Integrated Azure App Gateway and Load Balancer for secure traffic management
- Used Azure SQL and Cosmos DB for transactional and product catalog data
- Implemented secure authentication and authorization using Azure AD B2C
- Enabled monitoring and alerting using Azure Monitor and Application Insights
- Implemented auto-scaling to handle traffic spikes during promotions and campaigns
- Secured secrets and credentials using Azure Key Vault
- Optimized cloud cost using right-sizing, auto-scaling, and non-production shutdown

Project: S&OP Monitoring Application Deployment (Manufacturing Domain)

- Policy-driven cost governance using Azure Policy and mandatory tagging
- Event-driven cost control using serverless functions and budget alerts
- AI-based cost anomaly detection and spend forecasting
- FinOps dashboards providing business-level cost visibility
- Serverless and Spot instance adoption for variable and batch workloads

CERTIFICATIONS

- AWS Certified DevOps Engineer - Professional (Pursuing 2026)
- Certified Kubernetes Administrator (CKA) – (Pursuing 2026)
- Microsoft Azure DevOps Engineer Expert (AZ-400) -(Pursuing 2026)
- HashiCorp Certified: Terraform Associate--(Pursuing 2026)
- Docker Certified Associate -(Pursuing 2026)

LANGUAGES

English (Fluent), Marathi (Native), Hindi (Fluent)

EDUCATION

- **MBA in Operations Management**, Sinhgad, Pune University, 2014
- **B.Tech in Electronics and Telecommunication**, MIT, DR.BAMU, 2010
